1 How To Check Authenticity

*The screen images shown below are samples only. For actual operation, follow the on-screen instructions.

1.1 What is authenticity verification?

Screen Images

Steps

How to Operate

Digital watermarks are embedded in certificates issued at convenience stores. The person who receives the certificate (such as a company) can check the authenticity of the certificate.

As an authenticity confirmation procedure, launch the smartphone application "POPITA" (see the notes below) and hold it over the received certificate, and the screen will automatically access the confirmation site. You can confirm the authenticity of the certificate by entering the necessary information on the confirmation site that has transitioned.

Authenticity: Records created with legitimate authority are prevented from false input, rewriting, erasure, and confusion, and the responsibility for creation is clear from the motherboard's point of view.

【Certificate】

確認コード: XXXX-XXXX-XXXX

The image shows the authenticity confirmation screen. It has a light blue header with the text '真正性確認' (Authenticity Confirmation). Below the header, there is a section for the confirmation code, labeled '確認コード' (Confirmation Code). It has three input fields: '左 4 桁' (Left 4 digits), '中 4 桁' (Middle 4 digits), and '右 4 桁' (Right 4 digits). Below these fields, there is a yellow box with the text '注意事項' (Notes) and a bullet point: '• 証明書に記載されている確認コードを入力してください。' (Please enter the confirmation code written on the certificate). At the bottom right, there is a blue button labeled '確認' (Confirm). The screen is labeled with a blue circle containing the number 4.

1

Start the installed "POPITA" application.

2

POPITA app enables external camera.

3

Hold the camera so that the frame of the certificate fits within the frame of screen ②.
* No button operation is required.

4

If the reading is successful, the screen automatically changes to the authenticity confirmation screen. Enter the required information.

5

Enter the "confirmation code" written on the received certificate.
* The verification code is written on the lower left of the certificate.

6

After entering the necessary information, click the "Confirm" button.

If the verification code matches successfully, the certificate information will be displayed.

If the verification code is incorrect, you will see the verification result as shown below. Check the entered information again, and if "Certificate Information, Student Information" is not displayed, report to the university and confirm the originality of the certificate.
