(2) 【記述式の解答例】 以下は標準的な解答例であり、別解がある場合があります。

1. The potential benefits are that it may help people identify the locations of old snapshots from relatives or allow field biologists to conduct rapid surveys of entire regions for invasive plant species. (It could identify roads or power lines that need fixing, help monitor for biodiversity, or be used as a teaching tool).

2. They were inspired by a Swedish game called GeoGuessr (an online game that challenges players to geolocate photos), which was their common hobby. They wanted to see if they could build an AI player that could do better than humans.

3. It excels because it's the first AI that won against Trevor Rainbolt, and it can pick up on all the little clues humans can, and many more subtle ones, like slight differences in foliage, soil, and weather.

4. Because there were concerns that companies might soon use AI to track where people traveled, or that governments might check their photos to see if they visited a country on a watchlist. (Stalking and abuse were also obvious threats.)
